

FITC conjugated Goat Anti-Human Albumin (Alb), Polyclonal Antibody

Product Specification

Catalog No:	AL 10F-G1b, 1 ml
Host Species:	Goat
Size and Physical State:	1 ml in Freeze-dried powder
Antibody Concentration:	1 mg / ml
Source:	Polyclonal antibody purified by human albumin-Sepharose™ affinity column and labeled with FITC.
Preservation:	75 mM PBS, 75 mM NaCl, 0.5 mM EDTA, 0.02% NaN ₃ , pH 7.4.
Stabilizer:	5 mg / ml Bovine Serum Albumin.
Specificity:	Specifically binds to human albumin. Molar F/P ratio is 4.9. The investigator should determine working dilutions.
Use:	The antibody can be used to detect the existence of albumin with immuno-fluorescent approach.

Reconstitution and Storage: Freeze-dried product should be refrigerated until opened. After opening, restore to 1 ml with distilled water. If it is not completely clear after standing for 1-2 hours at room temperature, centrifuge the product. It is stable for several weeks at 4° C as an undiluted liquid. Do not use for more than one day after dilution. The products are light sensitive and should be kept in dark. To avoid repeated freezing and thawing after reconstitution, we suggest aliquots and storage at -20° C.
